incorporating TransWilts Community Rail Partnership

Can an hourly passenger train run service reliably on the TransWilts single line section Thingley Junction to Bradford Junction?

The following evidence is from the first 10 days of operation during the Box tunnel engineering works period in August 2015. The criteria of up to 10 minutes late, was used as the threshold for acceptable passenger operation. Based on this evidence the line is able to cope well with an hourly service and a mix of freight traffic.
